Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Team ID	SWTID-2026-7816
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	IT Ticket Creation	Create a new IT support ticket / incident with Caller Name and Short Description
FR-2	Automatic Ticket Classification	Analyze keywords in the Short Description and assign the correct Category and Subcategory
FR-3	Ticket Information & Caller Notification	Inform the caller about ticket creation and send an email notification
FR-4	Flow Designer Automation	Automatically process and classify tickets using ServiceNow Flow Designer without manual categorization

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple automated ticket classification with reduced manual effort for IT staff.
NFR-2	Security	Process IT support ticket information within the ServiceNow workflow.
NFR-3	Reliability	Consistently classify tickets and notify the caller after ticket creation.
NFR-4	Performance	Reduce the time required for manual review and categorization of support requests.
NFR-5	Availability	Online/Offline availability is not specified in the Auto Ticket Classification source.
NFR-6	Scalability	Support increasing request volumes through an automated, maintainable and scalable flow.
