Acceptance Testing
UAT Execution & Report Submission

Team ID	SWTID-2026-7816
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the UAT test coverage and results of the Auto Ticket Classification using Flow Designer project at the time of User Acceptance Testing (UAT).

2. Defect Analysis

This report shows the documented UAT test results and open issues identified during testing. No separate defect-severity counts are provided in the project report.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
Documented Defects	N/A	N/A	N/A	N/A	N/A
Open Issues	N/A	N/A	N/A	N/A	N/A
Classification Issues	N/A	N/A	N/A	N/A	N/A
Notification Issues	N/A	N/A	N/A	N/A	N/A
Data Validation Issues	N/A	N/A	N/A	N/A	N/A
Automation Issues	N/A	N/A	N/A	N/A	N/A
Other Issues	N/A	N/A	N/A	N/A	N/A
Totals	**N/A**	**N/A**	**N/A**	**N/A**	**N/A**

3. Test Case Analysis

Section	Total Cases	Not Tested	Fail	Pass
Wi-Fi Ticket Classification	1	0	0	1
Projector Ticket Classification	1	0	0	1
Password Issue Classification	1	0	0	1
Slow Computer Classification	1	0	0	1
Email Notification	2	0	0	2
Flow Trigger & Keyword Logic	4	0	0	4
Data Validation Checks	4	0	0	4
Total	**14**	**0**	**0**	**14**

4. Analysis Summary

- **Overall result:** 14 test cases were executed across 7 sections; 14 passed, 0 failed and 0 were not tested (pass rate 100%, execution coverage 100%).
- **Classification (4 cases):** Wi-Fi, Projector, Password and Slow Computer tickets were each classified correctly, covering all four ticket categories handled by the flow.
- **Flow logic and validation (8 cases):** Flow Trigger & Keyword Logic and Data Validation Checks hold the most cases (4 each, 57% of the total) and all passed, so the trigger conditions and keyword matching behave as designed.
- **Notification (2 cases):** Both email notification cases passed.
- **Defects:** No failed cases were recorded, and the report gives no severity counts (shown as N/A). Treat this as no documented defects rather than a confirmed count of zero.
- **Limitation:** Most classification categories have only one test case each, so coverage per category is thin. Adding negative or mixed-keyword cases would strengthen the evidence.
